

Digital Marketing

Brand, growth funnels, paid ads, content strategy, and conversion optimization

- Level: All levels
- Format: Self-paced micro-lessons + exercises
- Estimated time: 6-10 hours
- Last update: 2025-12-26

Digital marketing is a measurable growth engine. This module teaches the full funnel: audience research, messaging, content, paid ads, landing pages, and analytics. The focus is on profitable conversion, not vanity metrics.

Rule: Measure what matters. Optimize for conversion and lifetime value, not likes.

1. Learning Outcomes

By the end of this module, the learner will be able to:

- Define a target audience and value proposition
- Build a marketing funnel from traffic to conversion
- Run basic paid advertising with clear KPIs
- Use analytics to optimize conversion rate and retention

Prerequisites

- Basic understanding of social platforms
- Willingness to create and test content

2. Curriculum Map (Suggested Path)

Unit	Focus	Key Deliverable
1	Audience, positioning, and offer design	Offer statement
2	Content strategy and messaging	Content calendar
3	Paid ads fundamentals (platform-agnostic)	Ad test plan
4	Landing pages and conversion	Landing page checklist
5	Analytics and growth loops	KPI dashboard

3. Core Concepts

The funnel model

Marketing is a system: awareness -> consideration -> conversion -> retention -> referral. Build each stage intentionally.

Offer and positioning

Your offer is the combination of result + timeframe + proof + risk reversal. Positioning means why you are different and for whom.

Testing and iteration

Most marketing success is systematic testing: creatives, audiences, and landing pages. Small improvements compound.

Analytics and KPIs

Track CAC (customer acquisition cost), conversion rate, retention, and LTV. These numbers decide if growth is sustainable.

4. Practical Toolkit

Use these templates and checklists while you learn. Keep them in your investor journal.

Offer Blueprint

A strong offer beats a weak ad.

- Target audience and pain point
- Desired result and promise
- Mechanism (how you deliver)
- Proof and credibility
- Guarantee / risk reversal
- Call to action and urgency

Ad Test Plan

Run experiments without wasting budget.

- Define objective (lead, sale, signup)
- Set KPI targets (CPC, CPA, CVR)
- Test 3 creatives x 2 audiences
- Run for fixed time/budget
- Kill losers, scale winners

Landing Page Checklist

Increase conversion rate.

- One clear headline + benefit
- Social proof (testimonials, stats)
- Simple steps and CTA
- FAQ to handle objections
- Fast load time and mobile-first design

5. Hands-on Exercises

Create an audience persona

Define who you serve and what they need.

- Write demographics and context
- Write top 3 pains
- Write top 3 desired outcomes

- Write the one sentence value proposition

Output: Persona + value proposition

Build a 14-day content calendar

Plan content that moves users through the funnel.

- Choose 4 content pillars (education, proof, story, CTA)
- Plan 14 posts/videos
- Add one CTA per day

Output: Content calendar

Design a landing page wireframe

Draft sections and copy blocks.

- Write headline and subheadline
- Write key benefits bullets
- Add proof section
- Add CTA and FAQ

Output: Landing page outline

6. Quick Assessment (Self-Check)

Answer in 5-10 minutes. If you miss more than 2 questions, review Units 1-3.

- 1. What is the purpose of a marketing funnel?
- 2. Define CAC and why it matters.
- 3. What is conversion rate optimization?
- 4. Why do you test multiple creatives and audiences?
- 5. Name three elements of a strong offer.

7. Mini Glossary

CTA: Call to action.

CAC: Cost to acquire a customer.

LTV: Lifetime value of a customer.

CPC: Cost per click.

CVR: Conversion rate.

8. Next Steps

Use AI for Business to scale content creation and customer support, and Entrepreneurship to build a real company around the funnel.

- Write one offer blueprint for your product.
- Launch one small ad test with clear KPI targets.
- Review KPIs weekly and iterate.
